Benefit of early treatment
- 3,000,000 life-years
Walsensky, JID 2006;194:11

penalty for late starts

Dr. Kenneth H. Mayer, Director of HIV Prevention at Beth Israel Deaconess Hospital

It is hard to underestimate the importance of John Bartlett's role as a leader in the fight against AIDS, so I am delighted to lend my voice to so many others in paying tribute to John.

Dr. C. Everett Koop was also a beacon of light in addressing the AIDS epidemic. He was evidence-based, recognized the importance of overcoming fears about AIDS by providing rational information, was a compassionate physician and was able to influence public policy.

It is extremely fitting that John Bartlett is receiving the C. Everett Koop Health Leadership Award because he also exemplifies the admiral traits that Dr. Koop represented.

Dr. Tom Quinn, Professor and Director, Johns Hopkins Center for Global Health

Congratulations John Bartlett on receiving this year's C. Everett Koop Public Health Leadership Award.

We have a long history of working together working in the field of HIV. I cannot think of another person more deserving than you.

John, congratulations and celebrate this very important award with the gratitude of your colleagues.

John, It's been a pleasure to work with you on all levels of HIV for so many years.

We love you and I can't think of anybody who deserves this award more.

Congratulations!

Washington Blade | Steve Charing

Lynda Dee, President of AIDS Action Baltimore

David Thomas, Professor and Chair, Infectious Diseases, Johns Hopkins School of Medicine

For Dr. Koop it was obviously smoking and HIV, and with John it was HIV, bioterrorism, C. difficile and antimicrobial resistance.

It's astonishing to think of how much John has accomplished, For many of us, it would be enough to have done just one of those things.

Hats off and a big hug to John!

I am so thrilled to wish you congratulations on a well-deserved lifetime award.

You have taught me how to be the best kind of clinician, and you have demonstrated how I should strive to do so.

You have most definitely influenced me as an infectious disease physician; I can honestly say I am in this field because I was a second year medical student with you.

*Rochelle Walensky, Professor of Medicine,
Harvard Medical School*
