■ Strengthen knowledge with pre-conference tracks on HIV vaccines, biomedical interventions, cure research, hepatitis c and cutting edge research.

■ Increase community participation in and understanding of AIDS 2012 science sessions.

■ Increase community utilization of science and treatment information.

■ Provide an orientation of the science tracks to CBO/NGO HIV/AIDS workers.

■ Provide support to CBO/NGO workers during the conference.

■ Increase the productivity of community activists at AIDS 2012.

■ Expand treatment advocacy among people of color, low-income countries and women.

■ Strengthen connections among treatment activists from around the world.

■ Provide support in the development and execution of post conference updates.
