

PROMOTING GLOBAL COLLABORATION IN HBV CURE RESEARCH

Co-Sponsors for this webinar

Mission

ICE-HBV aims to fast track the **discovery** of a safe, effective, affordable and scalable **cure to benefit all people** living with CHB, including children and people living with HCV, HDV and HIV co-infection. ICE-HBV intends to **contribute to the elimination of CHB** as a global public health challenge.

ICE-HBV Organization

- Formed from the HBV basic and translational scientific community
- Governing board with world-wide representation by clinicians and basic scientists from academia and governmental research institutes
- Working groups targeting challenges in HBV and HDV biology and cure research
- Work closely with industry

Key initiatives

- Publish HBV/HDV cure strategy white papers
- HBV protocol repository
- HBV reagent repositories (with USA NIAID)
- Define standardized protocols for HBV cccDNA quantification
- Research symposia, think tanks on HBV and HDV cure, and educational materials in many languages
- Patient-focused conferences bringing together community activists and leading HBV researchers
