

HIV/TB Co-Infection

New Visions, New Directions

*Co-Sponsored by ANRS, Forum for Collaborative HIV Research
and IAS*

Scientific Steering Committee

Francoise Barre-Sinoussi, Institut Pasteur & ANRS

Anne Goldfeld, Harvard & Cambodia Health Committee

Mark Harrington, Treatment Action Group

Dianne Havlir, UC San Francisco

Barbara Laughon, NIAID/National Institutes of Health

Karen Manson, Tibotec

Craig McClure, International AIDS Society

Veronica Miller, Forum for Collaborative HIV Research

Paul Nunn, WHO-Stop TB

Renee Ridzon, Bill & Melinda Gates Foundation

Melvin Spigelman, The Global Alliance for TB Drug Development

Confronting the problem through an integrated research agenda

- Provide a platform for maximizing the research efforts through synergy, integration and collaboration
- Can we put together a global road map including all disciplines and constituencies?
 - TB and HIV “communities”, basic science, clinical science, trials and open access programs, health economists, policy makers, regulatory agencies, etc etc
- Best use of what we have today; better tools for tomorrow
- Let’s get started!
 - Toronto 2006?

*Continuing the Focus on HIV-TB
Research*
