

Forum for Collaborative HIV Research: Long-Term Monitoring of Treatment Related Adverse Events in the Resource Limited Setting Step 2: Developing a Plan, Agenda Notes

Esperança Sevene
Pharmacovigilance Unit
Faculty of Medicine – UEM
Maputo, Mozambique

March, 2006

## **Spontaneous reporting**

- Proposal of implementation of PV in Mozambique, 2003
  - National centre located in CIMed
  - Information about adverse drug reactions to all drugs
  - All health care providers should report

### **Spontaneous reporting**

- Implementation step by step
  - Started with Pilot phase in two districts (Namaacha and Matutuíne) in collaboration with malaria control programme/LSDI
  - Recently 4 more districts received training
     (Boane, Magude, Marracuene and Manhiça)

# **Spontaneous reporting**

- Development of ADR reporting forms
- Development of a guidebook
- -Training health professionals
- -Quality assurance visits
  - How to fill the form
  - Flow of information
- Membership application

ESTA INFORMAÇÃO E CONFIDENCIAL

# GUIA PARA DETECÇÃO E NOTIFICAÇÃO DE REACÇÕES ADVERSAS A MEDICAMENTOS

Porque é que os profissionais de saúde devem agir?

POR UM USO SEGURO DE MEDICAMENTOS EM MOÇAMBIQUE

República de Moçambique Centro de Informação sobre Medicamentos (CIMed) Maputo, Agosto 2004

### **Spontaneous reporting**

#### **Results:**

- About 150 health professionals were trained
- The PV Unit received about 100 ADR reports
- Most of the reports were from technicians, nurses and agents (medium and basic level)

# **Spontaneous reporting**

Table 1: Examples of the most important adverse reactions received

ADR

**Drug suspected by reporter** 

Severe skin reactions Co-trimoxazole, SP, SP+Artesunate,

Pyrazinamide, Niverapine

Convulsions Procaine penicillin

Psychomotor agitation Procaine Penicillin

Death Quinine

Haemolytic anaemia Diclofenac

Flaccid paralyze Coarten

Treatment failure SP-Artesunate

# **Spontaneous reporting**

#### **Conclusions**

- •The health professionals from different levels are able to implement PV system
- The implementation has to be adapted to the reality of each district
- Training and supervisory site visits are critical to improve and stimulate reporting
- Collaboration with MCP and other DCP could help to expand and sustain the system

# **Intensive Monitoring**

- Cohort study of intensive monitoring of antimalarial drugs during pregnancy in Manhiça district
- Pregnant women are recruited in any admission and at delivery time
- •Information about use of anti-malarial drug during pregnancy for treatment/prophylaxis of malaria are recorded

## **Intensive Monitoring**

- Assessment of the effect of the intervention on the incidence of adverse drug reaction in pregnant women and in the baby
- Child is assessed at delivery time, first and twelve month after delivery
- Information about use of other drugs are included
