- **Rhodessa Jones and the Medea Project**
 - *Special presentation; Tuesday Nov 27th Dinner*

Why Extend Summit To VH?

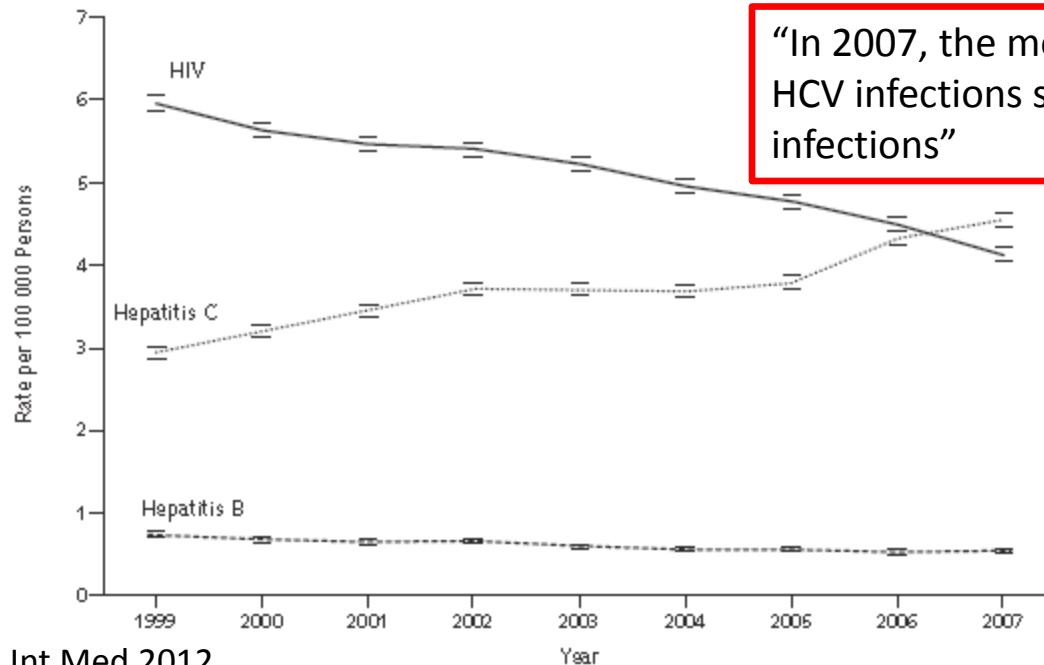

- Two viral epidemics affecting significant populations in the US
- Two viral epidemics fed by health disparities
- Two national plans/strategies
- Sensitive, specific tests
- Anti(retro)viral treatment available
- Individual AND public health benefits
- Public health program synergies

HIV, HCV and HBV Mortality Rates

Figure. Annual age-adjusted mortality rates from hepatitis B and hepatitis C virus and HIV infections listed as causes of death in the United States between 1999 and 2007.

“In 2007, the mortality rate associated with HCV infections surpassed that from HIV infections”

Ly; Ann Int Med 2012

Since the 2010 Summit

- Obamacare
- Viral Hepatitis Action Plan
- New Treatments: DAA's for HCV
- HPTN 052
- PrEP Approved
- Revised USPSTF Recommendation for HIV screening
- Revised USPSTF Recommendation for HCV screening

Bridging HIV and HCV: The Science

- HIV

- Diverse testing platforms and modalities
- Targeted testing misses folks
- Folks will get tested if testing is “routine”
- Life-long viral suppression
- \downarrow Virus = \downarrow Transmission

- HCV

- Diverse testing platforms and modalities
- Targeted testing misses folks
- Will folks get tested if testing is “routine”?
- Cure
- Will ~~Virus~~ = ~~Transmission~~?

Bridging HIV and HCV: The Programs

- Synergies
- Opportunities for collaboration
- Efficiencies in cost and resources
- Implementation of the ACA

2012 National Summit

- Taking stock:
 - Where are we today?
 - How far have we come?
 - What is the action plan going forward?
- How do we unite the promise of research and the reality of implementation?

Let's get to work
